

EASYTOUCH®

CONTROL SYSTEMS PAIRED WITH
AUTOMATED CHEMICAL MANAGEMENT

Because automation makes it all so simple!

EASYTOUCH® CONTROL SYSTEMS

WHO SAYS POOL AUTOMATION HAS TO BE COSTLY AND COMPLICATED?

Scheduling and controlling the operation of pool and spa equipment and related poolscape accessories became blissfully automatic, simple and affordable after the launch of EasyTouch systems in early 2000. They eliminated the inconvenience of repeated trips to the equipment pad, memorizing operating sequences, opening and closing valves, and resetting time clocks and thermostats.

What's more, EasyTouch systems set the standard for operating simplicity with push-button operation and clear, intuitive instructions and displays.

Today, the EasyTouch system family offers even more features, options and technology while remaining affordable for any inground pool owner. They also remain the simplest to program and operate...push-button simple.

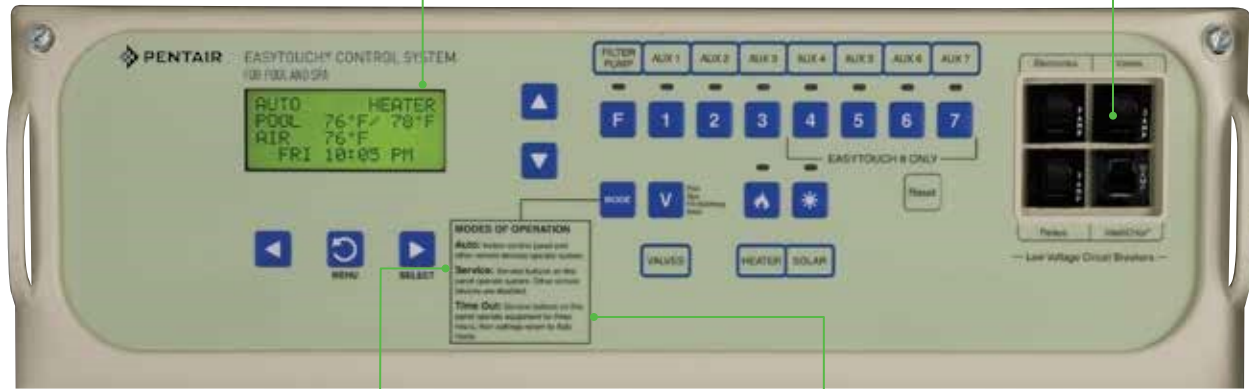

THE ULTIMATE CONVENIENCE IN POOLSIDE CONTROL, RIGHT AT YOUR FINGERTIPS.

Add an optional ScreenLogic® Interface Kit to your EasyTouch system, and you can control everything from pool and spa temperatures to jets, lighting, water features and more—right from your favorite Apple® or Android® device. The ScreenLogic interface gives you access to your pool's and/or spa's operation from practically anywhere, anytime using your PC, Mac® computer, iPad®, iPhone®, iPod touch® mobile digital device or Android device. Whether you're across the deck or around the globe, pool control has never been this easy.

The EasyTouch system control panel makes programming easy, while the LCD informs and instructs you every step of the way.

The EasyTouch system integrates resettable circuit breakers into the Load Center—everything is readily accessible by you or your service professional from outside your home.

Put your EasyTouch system into Service mode to aid in system testing and troubleshooting from the Load Center—no need for service personnel to enter your home.

Time Out mode allows programs to be temporarily interrupted before automatically resuming several hours later—no need to reprogram.

IT'S LIKE PUTTING POOL AND SPA OPERATIONS ON CRUISE CONTROL...

EasyTouch systems are available for separate pools and spas, as well as pool/spa combinations with shared equipment. You select from systems that control four or eight accessory functions. Four-function systems are typically used to control pool and/or spa operation plus pool or spa lights and heaters. Eight-function systems allow separate scheduling for additional features, such as landscape lighting, waterfalls, fountains, additional heaters, pumps and more.

...AND AUTOMATING WATER SANITIZATION, TOO.

Today, you can also choose from systems that incorporate the revolutionary IntelliChlor® Salt Chlorine Generator. IntelliChlor generators use table salt to create pure chlorine for pool sanitization the convenient and automatic way. Electrolytic chlorine generation is the easiest, most effective and convenient way to keep pool water sparkling clean.

Your EasyTouch system includes all circuitry and fully programmable controls in a single Load Center unit installed near your pool or spa equipment.

For pool/spa combinations with a shared body of water, you also receive two valve actuators for automatic switching between pool and spa operating modes.

For added flexibility and convenience, indoor, spa-side and wireless remote control devices can be added to any EasyTouch system (see next page).

As you can see, with EasyTouch systems, pool, spa and poolspa accessory operation—including sanitization—becomes as simple as operating your automatic lawn sprinkling system.

NO OTHER POOL OR SPA CONTROL DEVICE OFFERS SUCH CONVENIENCE.

- Easily turn on your spa and set it to the perfect temperature on your way home from work.
- Control all circuits when you are away—including waterfalls, pool lights, fountains and more.
- Use the History page to monitor temperature, pool/spa, heater and lights from afar.
- With an optional ScreenLogic interface kit, you can remotely manage your pool settings from a PC, Mac computer or other Apple or Android device when you download our software app from the Apple App StoreSM or Google PlayTM.

SO SIMPLE. SO CAPABLE. SO RELIABLE.

- All functions are controlled with easy, one-button access from the totally self-contained Load Center or optional controllers. No need for added control panels or devices but plenty of options if you desire remote access. That's flexibility and a main reason why EasyTouch systems are so affordable.
- The EasyTouch system allows full programmability of everyday pool and spa equipment operation for optimum efficiency and variable pool/spa usage patterns.
- Onboard diagnostics make service simple. Built-in, self-test diagnostics give you the ability to verify correct operation of specific functions.
- The electronic self-test includes automatic verification of the display, microprocessor, switches, indicators, relay outputs, valve outputs, sensor inputs and communications ports. A diagnostic screen reports failures for troubleshooting and repair purposes.
